A photograph of a man in teal scrubs sitting on a stone ledge with a fluffy dog. The man is smiling and looking towards the camera. The dog is sitting in front of him, looking happy. The background shows a home interior with a fireplace, a painting, and a chandelier.

The Softer Side of Beauty

“The one thing that is true about beauty is that when you see it, you know it.”

Dr. Jhonny Salomon approaches surgery as an art form.

A NEW GENERATION of superstar plastic surgeons has given the profession a glamorous position in this new era of radical makeovers. What once was taboo has been released into the open. Cosmetic procedures used to be invasive, painful and highly guarded secrets reserved for celebrities and mature women who wanted to maintain their youthful appearance. That has forever changed. Cosmetic procedures today are ambulatory, comfortable and less invasive. This is a sign of a society that places a great deal of importance on physical beauty. Dr. Jhonny Salomon, M.D., FACS, understands the difficulty in defining beauty. “Throughout history philosophers and artists have tried to come up with a definition, but it changes according to the historical moment. The one thing that is true about beauty is that when you see it, you know it,” says the doctor.

Relaxation lounge

“Plastic surgery is an art form to a certain degree with the knowledge that the human body is a lot more restrictive than any other art medium, and the results are based on medical components as well.”

Dr. Salomon, a gracious, soft-spoken surgeon with impeccable looks is a renaissance man. He has traveled the world looking for inspiration and knowledge and has amassed an incredible art collection, part of which he displays at his new Medi Palace, a state of the art medical spa located in Coral Gables. He elevates the spa trend to a whole new level, with revolutionary procedures, accommodating access points, ultimate privacy and the comforts of home. The new location is a work of art in itself. Straight minimalist lines and sterile surroundings are splashed by notes of color from the Dr.'s personal art collection including works by Haitian artists Bernard Séjourné and Jean Claude Legagneur as well as paintings by Mexican artist Carlos Oviedo.

Upon arrival at The Medi Palace, created by architect Richard Johnson and designed by Johanne Saieh in collaboration with Dr. Salomon, you feel as one would in a Zen oasis. Medi Palace is the convergence of beauty and form, a place that allows our spirits to soar while we heal our bodies. It features separate waiting rooms, relaxation lounges, four laser treatment rooms, additional non-invasive treatment areas, a Botox® room strategically designed to let in natural light, a fully equipped operating theater that facilitates all surgery procedures, a recovery area and private administrative offices with a 360 degree view of sunny Miami.

The new spa is a haven where comfort meets technology. Natural light showers the rooms with crisp transparency that induces relaxation and well being. The staff is attentive and reserved, taking care of your needs without hesitation. Services include Botox, fillers such as Restylane, Juvederm and Radiesse, advanced cellulite removal, skin tightening, sun damage and fine wrinkle removal, vein removal, laser hair removal, a comprehensive nutritionist and wellness program, eight different types of massages and six different types of facials with top of the line skin products.

Dr. Salomon considers his work more than just clinical. He approaches surgery as an art form based on a holistic concept.

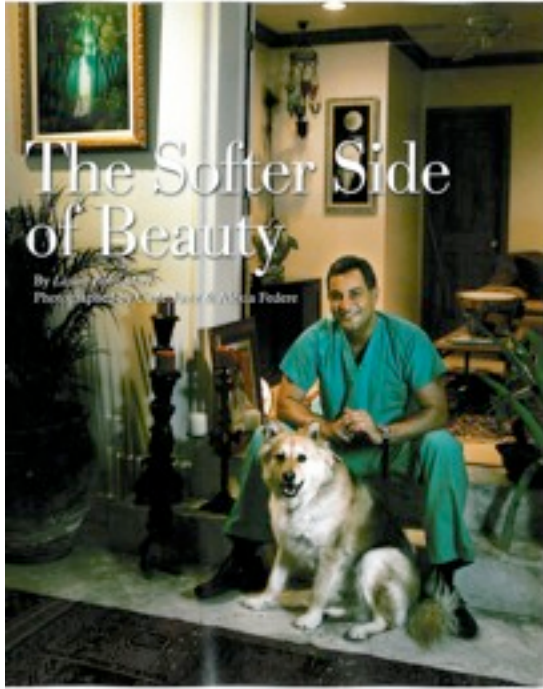

“Plastic surgery is an art form to a certain degree with the knowledge that the human body is a lot more restrictive than any other art medium, and the results are based on medical components as well. I use the human body as a template for my work, but I am very respectful of the human body. I think I am an artist, but with a lot of reservation,” says Dr. Salomon about the relationship between art and the creation of beauty. A magna cum laude graduate from Boston University, Dr. Salomon is renowned for his “believable beauty” both on reconstructive and cosmetic patients. He has been featured on television shows including *Miami Slice* on Bravo and *Plastic Surgery: Before and After* on Discovery Health and donates his free time to Operation Smile to help, free of charge, children born with correctable birth defects. “I contribute to Operation Smile here and in other countries. It is something I really enjoy,” concludes Dr. Salomon.

Peace, beauty and comfort are elements that enhance our overall well being. This translates into a more fruitful life and better relationships with our loved ones, our professions and our surroundings. Medi Palace is a great environment to start healing our bodies and our souls. SA

"The one thing that is true about beauty is that when you see it, you know it."

Dr. Jhonny Salomon approaches surgery as an art form.

A NEW GENERATION of superior plastic surgeons has given the profession a glamorous position in this new era of medical advances. What once was taboo has been released into the open. Cosmetic procedures used to be invasive, painful and highly guarded secrets reserved for celebrities and those who wanted to disguise their genetic appearance. That has since changed. Cosmetic procedures today are accessible, comfortable and less painful. This is a sign of a society that places a great deal of importance on physical beauty. Dr. Jhonny Salomon, M.D., FACS, understands the difficulty in achieving beauty. "Throughout history philosophers and artists have tried to define up with a definition, but it changes according to the historical moment. The one thing that is true about beauty is that when you see it, you know it," says the doctor.

"Plastic surgery is an art form to a certain degree with the knowledge that the human body is a lot more restrictive than any other art medium, and the results are based on medical components as well."

Dr. Salomon, a gracious, soft-spoken surgeon with impeccable looks is a musician man. He has traveled the world looking for inspiration and knowledge and has amassed an incredible art collection, part of which he displays at his new Medil Palace, a state of the art medical spa located in Coral Gables. He stresses the appeal to a whole new level, with revolutionary procedures, accommodating access points, ultimate privacy and the comfort of home. The new location is a work of art in itself. Bright minimalist lines and exotic surroundings are updated by pieces of value from the Dr.'s personal art collection including works by Russian artist Bernard Stizneroff and Jean Claude Lagarde as well as paintings by Wisconsin artist Carlos Ozorio.

Upon arrival at The Medil Palace, created by architect Richard Johnson and designed by Johnson Smith in collaboration with Dr. Salomon, you feel as one would in a five-star. Medil Palace is the convergence of beauty and form, a place that allows our spirit to soar while we heal our bodies. It features separate waiting rooms, relaxation lounge, hair laser treatment rooms, additional non-invasive treatment areas, a SpaCafe, rooms strategically designed to be in natural light, a fully equipped operating theater that facilitates all surgery procedures, a recovery area and private administrative offices with a 360 degree view of sunset Miami.

The new spa is a luxury where comfort meets technology. Natural light illuminates the rooms with crisp transparency that induces relaxation and well-being. The staff is attentive and earned, taking care of your needs without hesitation. Services include Botox, fillers such as Restylane, Juvederm and Radiseo, advanced cellulite treatment, skin tightening, scar damage and fine wrinkle removal, nose reduction, hair laser removal, a comprehensive nutritional and wellness program, eight different types of massages and six different types of facials with top of the line skin products.

Dr. Salomon considers his work more than just clinical. He approaches surgery as an art form based on a holistic change.

"Plastic surgery is an art form to a certain degree with the knowledge that the human body is a lot more restrictive than any other art medium, and the results are based on medical components as well. I see the human body as a canvas for my work, but I am very respectful of the human body. I think I am an artist, but with a lot of reservations," says Dr. Salomon about the relationship between art and the creation of beauty. A magna cum laude graduate from Boston University, Dr. Salomon is recognized for his "Invisible Beauty" both on reconstructive and cosmetic patients. He has been featured on television shows including Miami Vice on Bravo and Plastic Surgery: Before and After on Discovery Health and doctors like him visit to Operation Smile to help, free of charge, children born with considerable facial defects. "I contribute to Operation Smile here and in other countries. It is something I really enjoy," concludes Dr. Salomon.
